## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 drawn to an acid-modified fiber product, classified in class 8, subclass 116.1.
- II. Claims 12-16, drawn to paper product containing an acid-treated fiber product, classified in class 162, subclass 1+.
- III. Claims 17-20, drawn to a food composition containing an acid-treated fiber material classified in class 426, subclasses 615 and 626.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated, having different physical properties, modes of operation, different functions, and/or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are physically and functionally distinct, in content, appearance and use. The paper product is not used as a food product, and vice-versa.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
